

RECIRCULATING HYDROPONICS SYSTEMS

Maintain E.C. between 1.2-1.8 during Growth, 1.8 – 2.4 during Bloom and 1.8 in final week or flush. pH should be maintained between 5.5-6.5. This is a guideline only. Individual circumstances vary.

For coco mediums use CX Coco Base A&B. For soil, soilless and all other mediums use CX Hydro Base A&B.

■ Growth Stage ■ Bloom Stage

Clone Start	Foliar feed for clones
Spotless	Spray plants twice a week as required.
PMT	Spray plants twice a week as required.
TaNLIN	Use as a medium drench and/or add to nutrient reservoir as directed.
