

## RECIRCULATING HYDROPONICS SYSTEMS

Maintain E.C. between 1.2-1.8 during Growth, 1.8 – 2.4 during Bloom and 1.8 in final week or flush. pH should be maintained between 5.5-6.5. This is a guideline only. Individual circumstances vary. **Do not attempt to lower pH in week 6. It is common for pH to be in excess of 7, this is intentional. Both phosphorus and potassium are readily available at this pH.**

	ALL WEEKS	WEEK 1	WEEK 2	WEEKS 3-5	WEEK 6	REMAINDER OF FLOWER	FLUSH
Coco / Hydro A	1-3ml/L	1-3ml/L	1-3ml/L	1-3ml/L	-	1-3ml/L	-
Coco / Hydro B	1-3ml/L	1-3ml/L	1-3ml/L	1-3ml/L	-	1-3ml/L	-
Regen-A-Root	1ml/L	1ml/L	1ml/L	1ml/L	-	1ml/L	-
Wilt Guard	1ml/L	1ml/L	1ml/L	1ml/L	-	1ml/L	-
Bio Balancer	0.25ml/L	0.25ml/L	0.25ml/L	0.25ml/L	-	0.25ml/L	-
Mighty Growth Enhancer	1ml/L	1ml/L	1ml/L	-	-	-	-
Mighty Bloom Enhancer	-	-	1ml/L	1ml/L	5ml/L	1ml/L	-
Head Masta	-	1ml/L	1ml/L	1ml/L	-	1ml/L	-

## RUN TO WASTE SYSTEMS

For coco mediums use CX Coco Base A&B. For soil, soilless and all other mediums use CX Hydro Base A&B.

**Do not attempt to lower pH in week 6. It is common for pH to be in excess of 7, this is intentional. Both phosphorus and potassium are readily available at this pH.**

	ALL WEEKS	WEEK 1	WEEK 2	WEEKS 3-5	WEEK 6	REMAINDER OF FLOWER	FLUSH
Coco / Hydro A	1-3ml/L	1-3ml/L	1-3ml/L	1-3ml/L	-	1-3ml/L	-
Coco / Hydro B	1-3ml/L	1-3ml/L	1-3ml/L	1-3ml/L	-	1-3ml/L	-
Regen-A-Root	1ml/L	1ml/L	1ml/L	1ml/L	-	1ml/L	-
Wilt Guard	1ml/L	1ml/L	1ml/L	1ml/L	-	1ml/L	-
Bio Balancer	1ml/L	1ml/L	1ml/L	1ml/L	-	1ml/L	-
Mighty Growth Enhancer	1ml/L	1ml/L	1ml/L	-	-	-	-

Head Masta	-	1ml/L	1ml/L	1ml/L	-	1ml/L	-

Clone Start	Foliar feed for clones
Spotless	Spray plants twice a week as required.
PMT	Spray plants twice a week as required.
TaNLiN	Use as a medium drench and/or add to nutrient reservoir as directed.

# REGEN-A-ROOT

ROOT STIMULATOR

Regen-A-Root nutrient additive is used during the vegetative and flowering period in all types of hydroponic, soil and coco based systems.

Regen-A-Root – Poor roots result in inferior yields and at worst, no yields at all. A plant's development is mirrored by its root system, so building healthy roots is the first chance you get in achieving the best results DON'T MISS IT! Regen-A-Root is the only root stimulator that works throughout the entire plant's development and not just the vegetative period, stimulating MASSIVE healthy roots that just don't stop growing!

STIMULATES MASSIVE ROOT GROWTH FROM START TO FINISH

EXTRA ROOTS DO NOT SACRIFICE TOP GROWTH

RUNS CLEAN IN ALL SYSTEMS

REPAIRS ROOTS LOST TO DISEASE

**GROW MASSIVE ROOTS** FROM **START TO FINISH...**

CX | HORTICULTURE

# BIO BALANCER

BIOLOGICAL ACTIVATOR

Bio Balancer nutrient additive is used during the vegetative and flowering period in all types of hydroponic, soil and coco based systems.

Hydroponic systems are wide open to attack from predatory micro organisms that, when left unchallenged, will overrun your system and destroy your crop. Use Bio Balancer in the first instance to tip the balance in your favour by creating and maintaining a population of beneficial micro organisms that will protect your system by stopping the bad guys from taking hold.

BIOLOGICALLY ACTIVATES INERT MEDIA AND GROWING SYSTEMS

BOOSTS DISEASE RESISTANCE AND NUTRIENT UPTAKE

SUPPRESSES DEVELOPMENT OF PREDATORY ORGANISMS

STIMULATES BLOOMS OF BENEFICIAL BACTERIA

**TIP THE BALANCE** <sup>IN</sup> YOUR FAVOUR...

CX | HORTICULTURE

# WILT GUARD

RESERVOIR & MEDIUM MAINTENANCE

Wilt Guard nutrient additive is used during the vegetative and flowering period in all types of hydroponic, soil and coco based systems.

Wilting plants are in trouble and if left untreated they will probably die. There are several causes of wilting, including heat and disease. To overcome wilting, you must treat your plants immediately to save your yield. Conditions such as wilt stress can completely devastate your crop every time. Wilt Guard, the grower's choice. Wilt Guard is pet, plant and person safe.

KEEPS PLANTS AND SYSTEMS HEALTHY

CROP PROTECTION THROUGH INDUCED RESISTANCE

REDUCES WILTING CAUSED BY DISEASED ROOTS

EFFECTIVELY RESCUES CROPS

**DON'T PANIC!** WILT GUARD HAS YOU COVERED

# MIGHTY GROWTH

ENHANCER

VEGETATIVE BOOSTER

Mighty Growth Enhancer nutrient additive is used during the vegetative and early flowering period in all types of hydroponic, soil and coco based systems.

A healthy, vigorous growth phase is essential in building the foundations that lead to big yields. Mighty Growth Enhancer increases the leaf size and chlorophyll density of your plants, accelerating their rate of vegetative growth. This increased food production capacity leads to a much tougher and more durable plant able to sustain an increased final yield.

INCREASES LEAF AREA, LIGHT INTERCEPTION AND UTILISATION

INCREASES PROTEIN AND CARBOHYDRATE PRODUCTION

INCREASES VIGOUR DURING VEGETATIVE GROWTH

INCREASES TOTAL YIELD

## SUPER CHARGE YOUR GROW

CX | HORTICULTURE

# MIGHTY BLOOM

ENHANCER

BLOOM BOOSTER

Mighty Bloom Enhancer nutrient additive is used during the flowering period in all types of hydroponic, soil and coco based systems.

Developed specifically to increase your crop's yield potential, Mighty Bloom Enhancer gives flowering plants exactly what they need to excel and build weight. Mighty Bloom Enhancer encourages more female flowering sites, heavier fruit and even works as a hardener. Use with Head Masta to further improve flavours, aromas and the overall quality of your crop.

INCREASES SOLID TO WATER RATIO FOR A HARD AND DENSE FINISH

MASSIVE INCREASES TO DRY FLOWER WEIGHT

INCREASES FEMALE FLOWERING SITES

PGR FREE

## THE HEAVY WEIGHT CHAMPION

CX | HORTICULTURE

# HEAD MASTA

QUALITY IMPROVER

Head Masta nutrient additive is used during the flowering period in all types of hydroponic, soil and coco based systems.

Achieving both high yields and high quality together can be difficult, as inferior products that increase yield, will often do so at the expense of quality. Head Masta is a sure fire way to get exceptional quality with improved flavours and aromatics from your high yielding crop. For an even heavier yield, use in conjunction with Mighty Bloom Enhancer.

IMPROVES QUALITY, AROMATICS AND FLAVOURS

PUMPS CELLS WITH SILICON FOR AN INCREASED YIELD

INCREASES OIL AND RESIN PRODUCTION

IMPROVES VISUAL APPEAL OF PLANTS

# GET THE HIGHEST GRADE
